Master Injection

LEADING FACTORY

MASTER PRODUCT,
JUST THE MASTER!

35000 m²
Plant Area of No.1

47000 m²
Plant Area of No.2

500+
Employees

400 Million
Output value

OUR COMPANY

Zhejiang Master Injection System Co.,Ltd. was established in 2003. It is a high-tech enterprise dedicated to the development, production and sales of electric fuel pumps for automobiles and motorcycles,VVT phasers and OCV oil valves.

The registered capital of the company is 50 million yuan, and there are currently two factory buildings with an area of 35000 square meters and 47000 square meters respectively. There are currently over 500 employees, and the annual output value is expected to exceed 400 million yuan in 2024. Our company invests in advanced automated production equipment and testing equipment every year to improve the quality of product production. We have successively introduced injection molding centralized feeding system, CNC robot finishing production line, automatic rotor production line, automatic fuel pump assembly line and comprehensive performance test bench, and various testing equipment in the experimental center.

Our products are exported to Europe, the Americas, Middle East, Southeast Asia and other countries and regions.

We sincerely welcome you to visit our factory or contact us directly for information.

FUEL PUMP

MasterInjection[®]

Master Fuel Pump Advantages:

fully automated production,
100% online performance
testing, performance increased
by 20% compared to original
parts, service life exceeding
100000 kilometers,
OEM supplier.

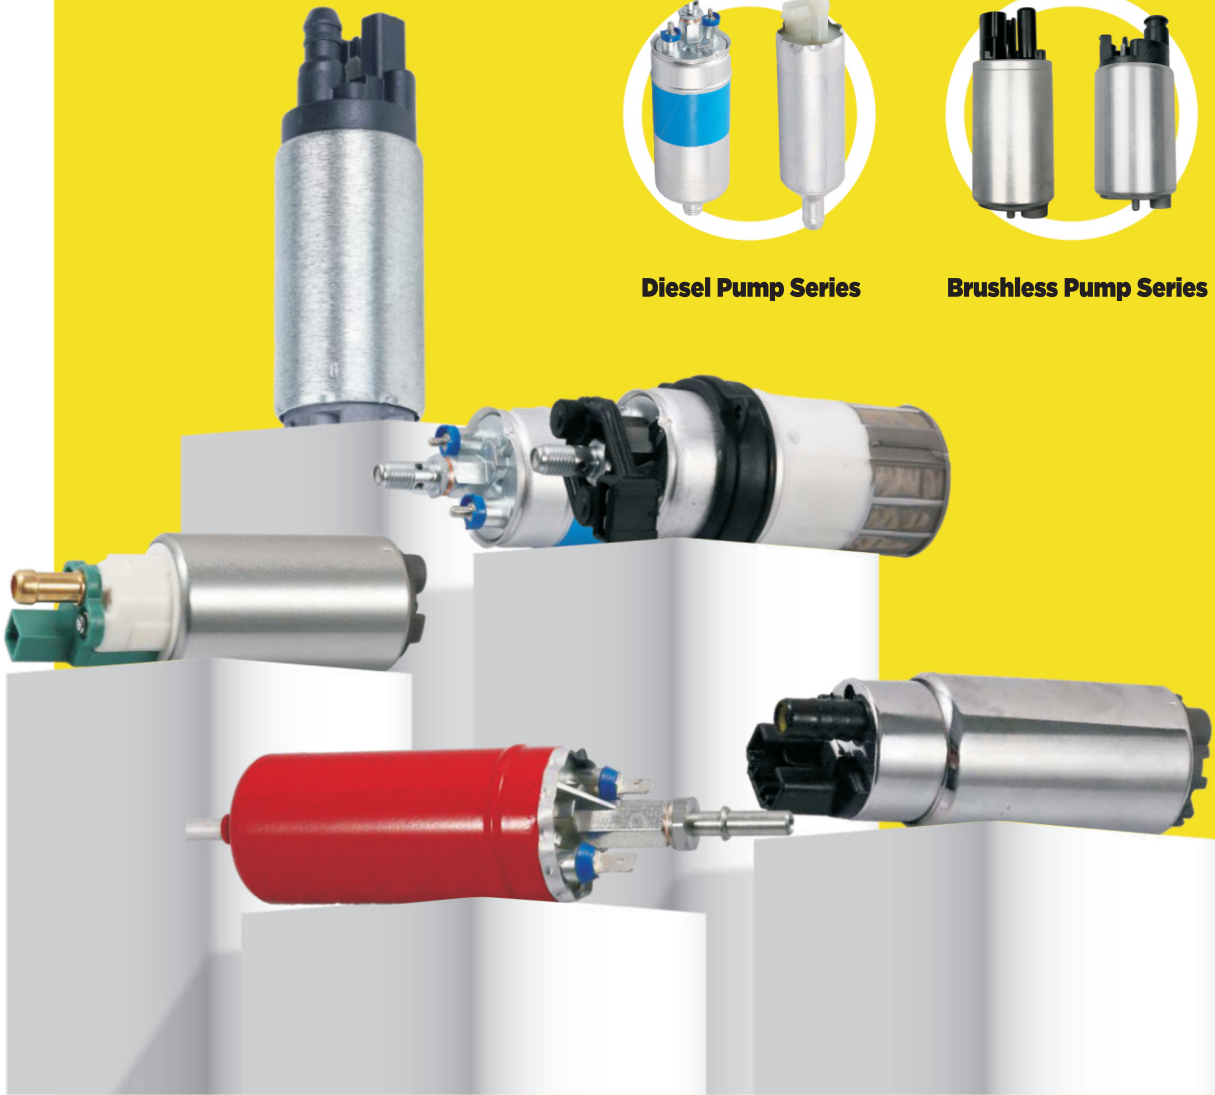

Fuel Pump Series

Diesel Pump Series

Brushless Pump Series

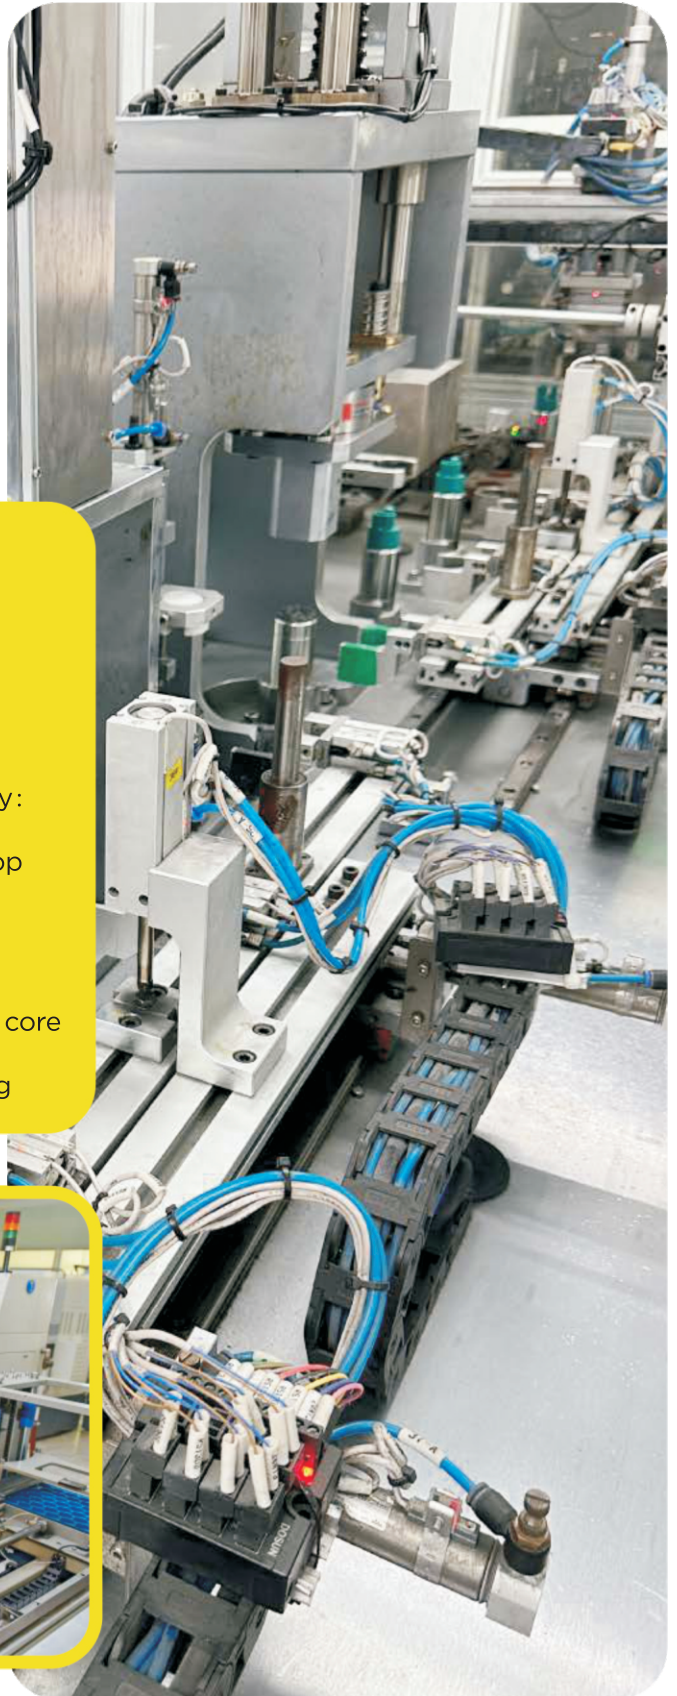

Master Fuel Pump Advantages:

fully automated production, 100% online performance testing, performance increased by 20% compared to original parts, service life exceeding 100000 kilometers, OEM supplier.

- Product research and development ability: More than 20% technical engineering personnel; We can customize and develop products according to specific customer requirement
- Automated production capacity: Seiko Machining Automation Equipment, Rotor machining, Fully automatic pump core manufacturing and assembly lines; Automatic Inspection Performance Testing

FUEL PUMP ASSEMBLY

Master Fuel Pump Advantages:

fully automated production,
100% online performance
testing, performance increased
by 20% compared to original
parts, service life exceeding
100000 kilometers,
OEM supplier.

Motorcycle assembly series

Master Injection®

FUEL PUMP

Master Fuel Pump Advantages:

Fully automated production, 100% online performance testing, performance increased by 20% compared to original parts, service life exceeding 100000 kilometers, OEM supplier.

Master Injection®

VVT PHASER

VVT technology can adjust the overlap time and timing of the engine intake and exhaust system (some or all of them), reducing fuel consumption and improving efficiency.

Advantages: Energy saving

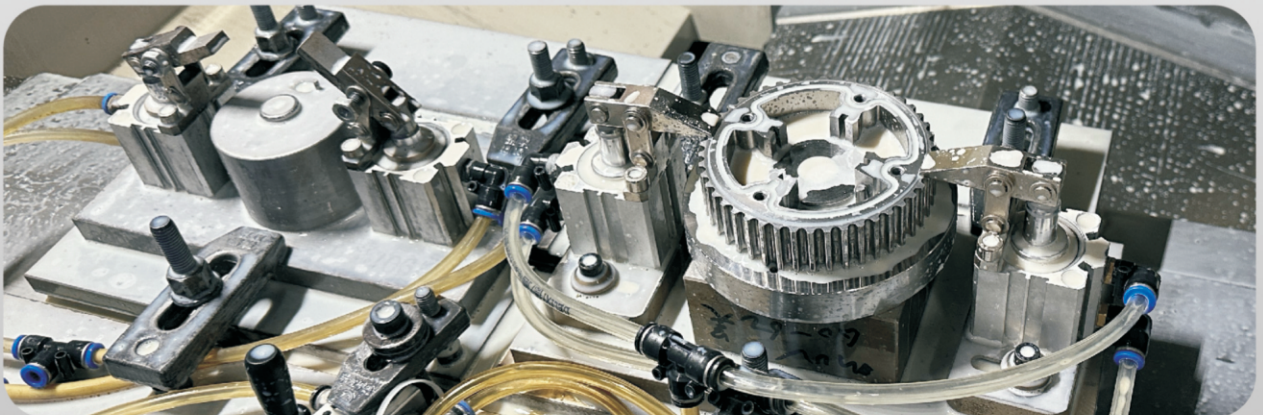

(fuel saving, increased power)

Objective: Improve fuel efficiency

Application: Engine

MasterInjection®

OCV OIL VALVE

OCV(Variable valve timing system device)

The inner coil is made of copper (imported material) to avoid bad short circuit, durable, three-layer filter effectively prevent impurities, sealing ring selection of imported durable material , prevent oil leakage; At present, there are German, Japanese, American, Korean and other systems of OCV valves and VVT wheels.

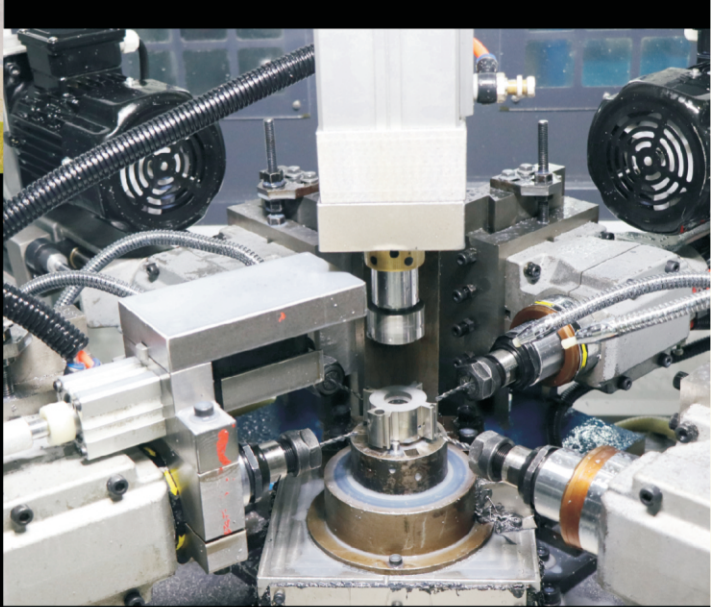

Master Injection

OUR BRANCH IN THAILAND

Our Thailand factory is established in 2024 and is located in Bangkok. It has an investment of 5 million US dollars and covers an area of 10000 square meters. It is expected to produce 1 million OVV oil control valves, 300000 VVT Variable Valve Timing, and 500000 fuel pump assemblies annually.
